Fast Facts

Pedals for trucks

Accelerator pedals are more than an Interface between driver and vehicle. Beside the driver’s perception of ergonomic and Kick-Down performance they support important functionalities for reducing fuel consumption, engine management and are also integrated into safety- and comfort systems.

Innovation
- Compact and robust design
- Design suitable for all cabin sizes
- Proprietary Autopad® sensor technology (inductive)

Typical features
- Contactless sensor technology
- Redundant output signal
- Typically 5 V supply voltage
- Programmable output signal characteristic
- High reliability
- FMVSS 124
- FMVSS 302

Design freedom
- Kick down function on demand
- Outer shape could be customized

General Note This Fast Fact does not give any information on product availability. The information given is just meant to describe the product and is not to be considered as guaranteed characteristics in the legal sense. All products are subject to design changes in the interest of further technical development.
